Note from Internet Publisher: Donald L. Potter

October 10, 2008

These *Blend Phonics Decoding Cards* are designed to facilitate student decoding practice. The idea is to carefully practice decoding words from left to right until the decoding process is fully automated. When decoding is fully automated, student will have more attention to allocate to comprehension and reading pleasure. I run my finger rapidly across the bottom of the card from letter to letter to encourage good left to right Blend Phonics directionality. These are not intended to be used as whole-word memorization flash cards. Faster decoding speeds should not be confused with sight-word memorization which should be avoided at all costs because it creates whole-word dyslexia (guessing).

Be sure to teach Mr. Potter's Secret of Reading: "**Look at all the letters the right way, and no guessing.**"

These cards are based on Hazel Loring's 1980 *Reading with Blend Phonics for First Grade*. The program and many valuable supplements are available free of charge from www.donpotter.net. This is a work-in-progress. Latest addition 11/1/08. Units 1 – 14: VCE, long a words. .

Suggestions for Classroom Use

The children love to play games with the cards. They love to decode the words on the cards and then create their own sentence using the word.

Advanced students can tutor their peers.

It is good to have the students periodically review the cards until they can decode the words rapidly. Rapid decoding is the wide open door to comprehension.

I hope to eventually publish these cards in cursive. I have a hand-made set I used in my class. Cursive is a great tool for preventing or curing whole-words dyslexia.
