Note from Internet Publisher: Donald L. Potter

February 8, 2014

I copied these sentences in 2004 from the 1970 *Victory Drill Book: A phonetic Approach to reading with an emphasis on speed* by August C. Enderlin III. There were no sentences in the VDB for Review 7 or 10. I wrote my own sentences for the missing Reviews and added them to this document on 3/25/14.

Andrea Carstensen revised *The Victory Drill Book* in 2009. Deborah Masin wrote new stories to go with the phonics drills. The new book changed the phonics order a bit by putting the long-vowel VCE patterns before the long-vowel digraphs (vowel teams). For reasons I can't fathom, the new editor seems to think that this is a "natural order." I agree that it may be "customary."

The sentences and stories written for the 1970 edition will not work with the new edition because of the changes in the phonics sequence - putting VCE long vowels before long vowel digraphs.

The phonics sequence and words in the 1970 edition were taken directly, without alteration, from Rudolf Flesch's 1955 *Why Johnny Can't Read and what you can do about it*. I spoke with Mr. Enderlin on the phone years ago. He explained to me that his schools used Flesch until it went out of print for a short time. Since he could not purchase Flesch during that hiatus in the history of the publication of Flesch's book, he republished the exercises in a slightly altered format as *The Victory Drill Book*. The VDB organized Flesch's Exercises in groups of 100 words per page to make it easier to time the students.

The 1970 VDB Stories and Sentences work perfectly with the Exercises in Flesch's *Johnny* because of the near identity of the two programs. I used them with my *Natural Phonics Primer™*, which is a classroom adaptation of Flesch's program.

Flesch called his phonics drills, "Exercises." I like Flesch's terminology because it reflects the nature of the drills as Exercises to develop mental decoding strength and speed: automaticity - just like physical exercise develops the strength and flexibility of the human body.
