Prepared by Donald L. Potter of Odessa, TX., on 9/3/12. www.donpotter.net

This “Reading Bear Content” was prepared by inspection of the *Reading Bear* Online program at www.readingbear.org.

Reading Bear is a carefully designed reading program based, down to the minutest detail, on Rudolf Flesch's incomparably effective phonics reading program published in the back of his 1955 bestseller, *Why Johnny Can't Read and What You Can Do About It*. *Reading Bear* preserves the phonics and sequence of Flesch's program in a modern high-tech interactive computer graphics format. I have personally taught Flesch's 72 phonics exercises to children, teens, and adults and can testify firsthand to its effectiveness.
